

ZKS

T1 Professional Fingerprint

Time Attendance & Access Control System

Brief Introduction

ZKS-T1 is an innovative fingerprint time attendance & access control system, designed to satisfy various demands of different occasions. Besides general integrated TA & AC function, T1 supports independent time attendance function and independent access control function, making it unique in the market. It benefits user by simplicity and efficiency: set professional time attendance and access control parameters in device directly without software; check detailed verify records and attendance reports in device or export data in excel format by USB.
